

## Vision & Scope

If you have ever not known what to make with the ingredients you have on hand this app is for you.

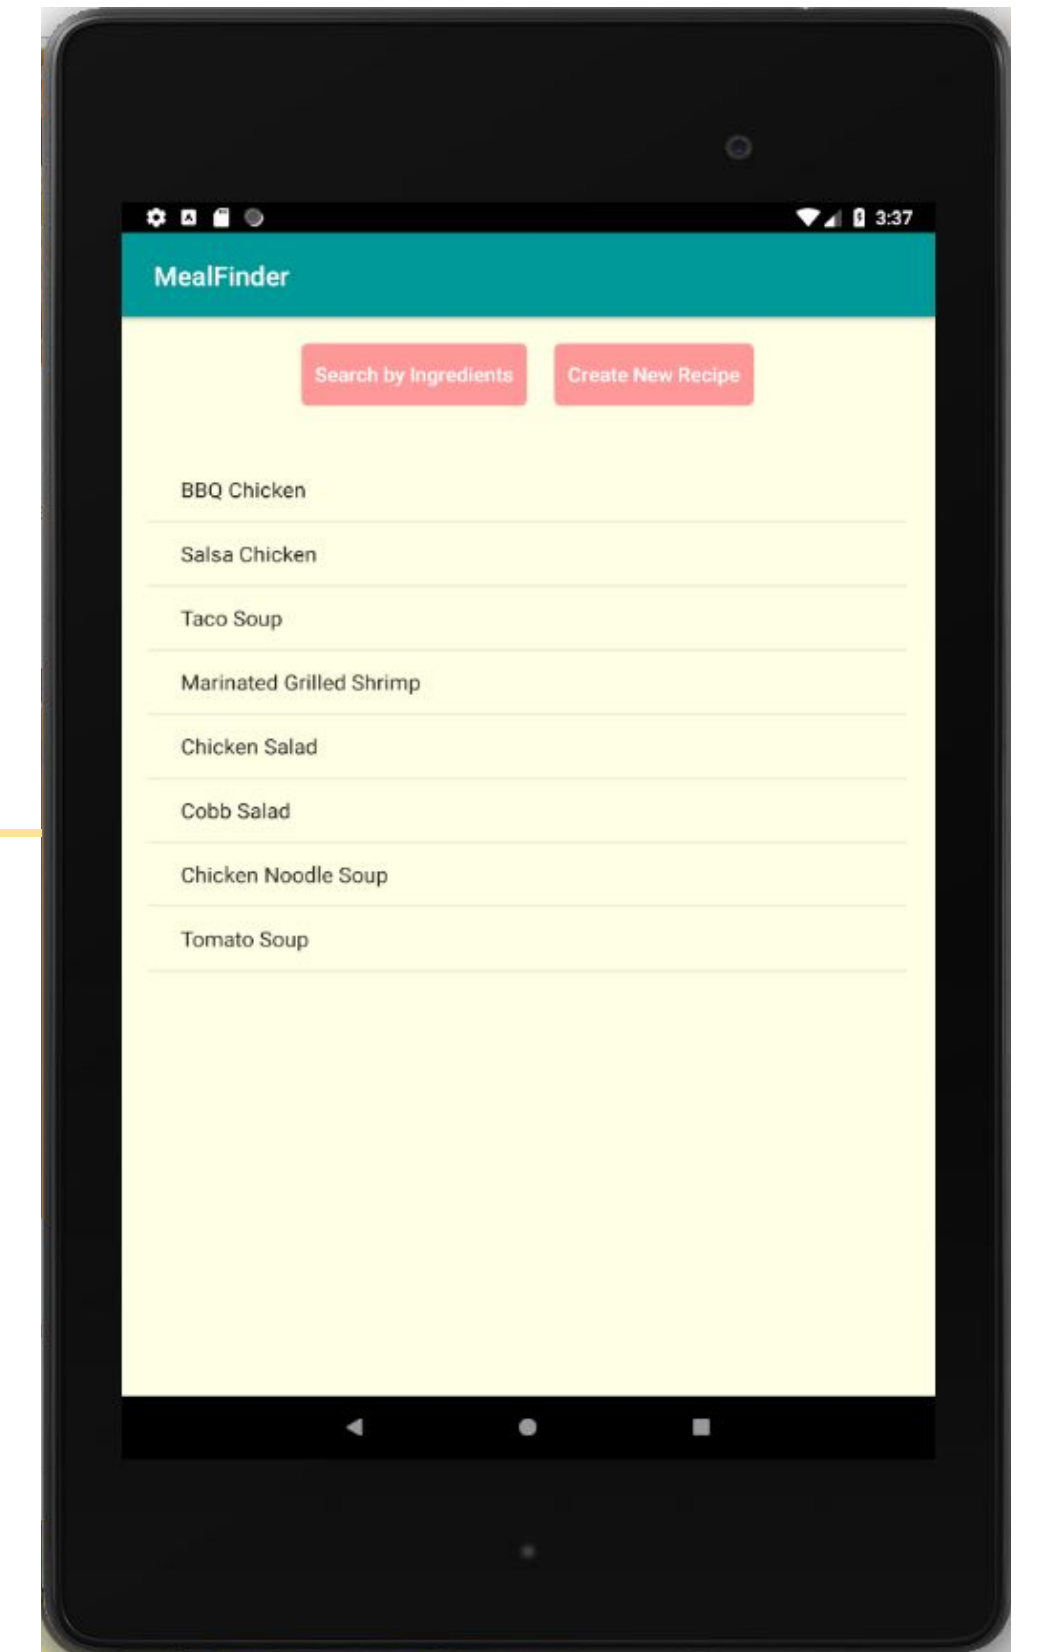

Enter the ingredients on hand and this app will pull recipes that you have saved and from online that contain the ingredients you already have.

### Search by Ingredient

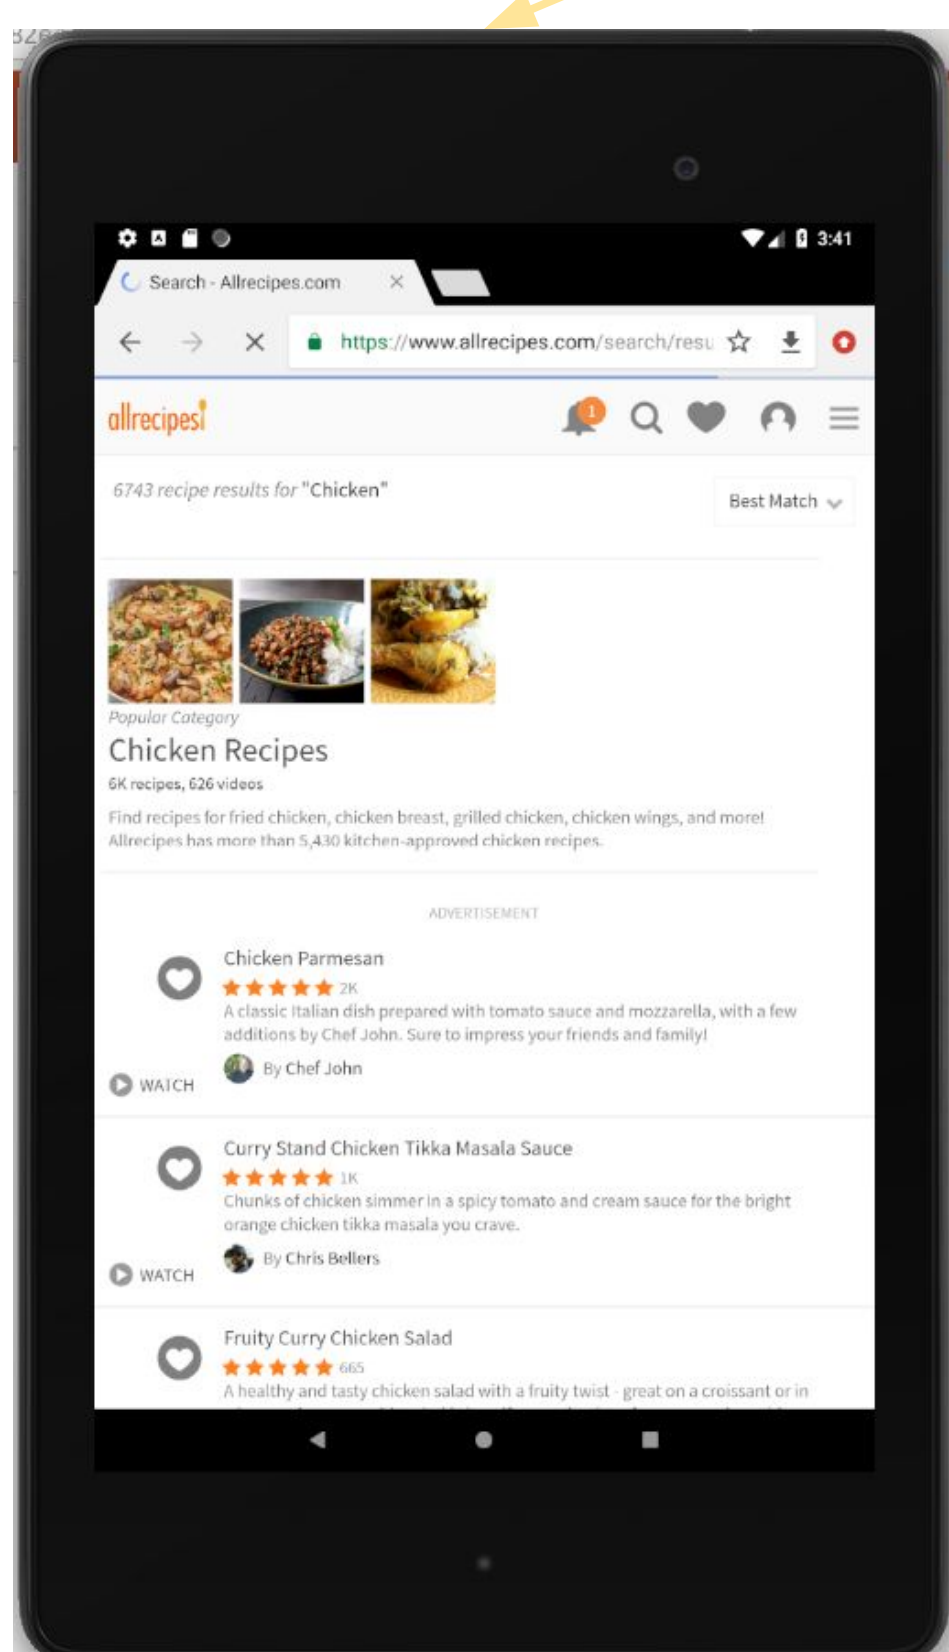

- Enter up to five ingredients and search either:
  - the local database
  - recipe website

### Main Page

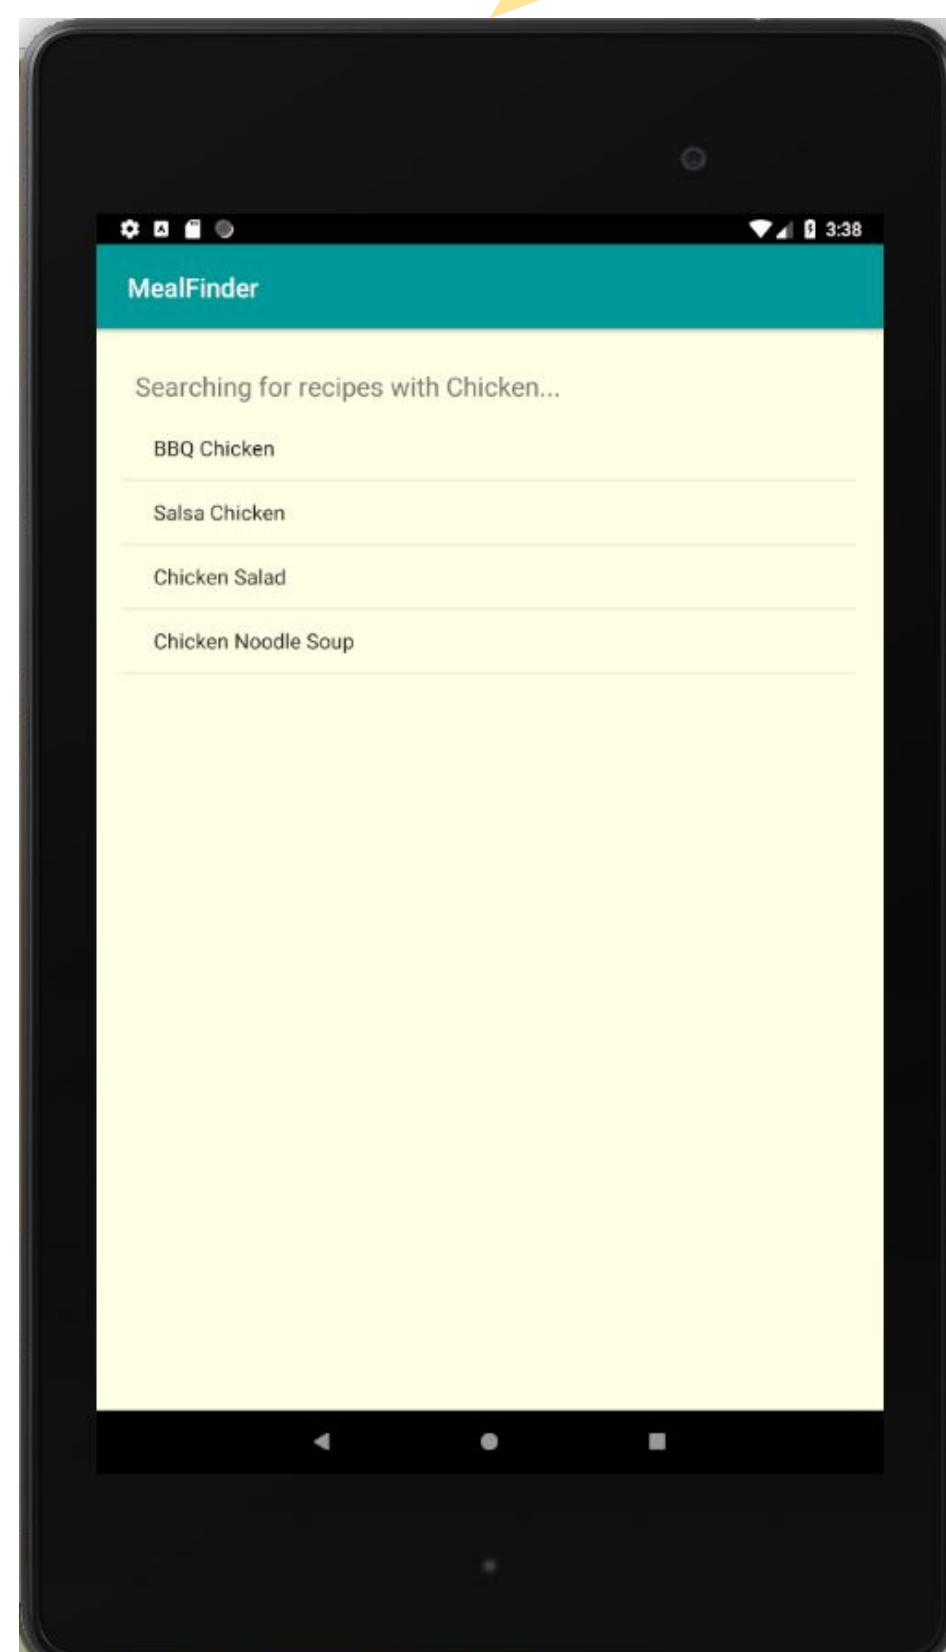

- Displays a list of all the recipes created by the user
- Navigation to create a new recipe or search for recipes

### Search Website

Search website using ingredients inputted by user on previous activity

### Search Database

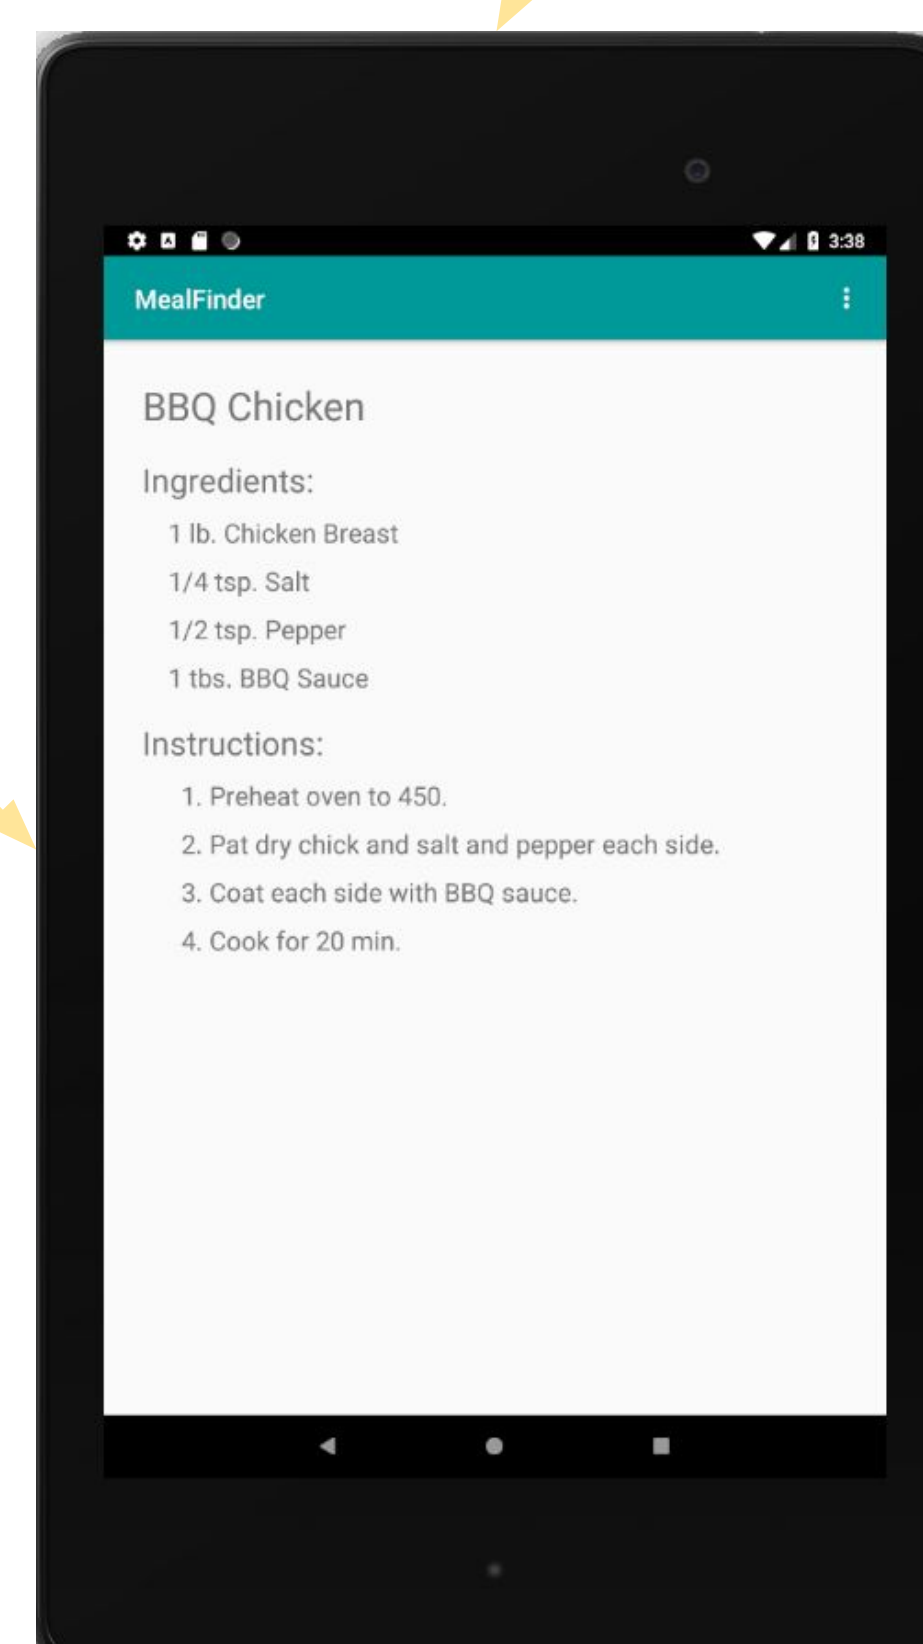

Search local database using ingredients inputted by user on previous activity

## Major Features

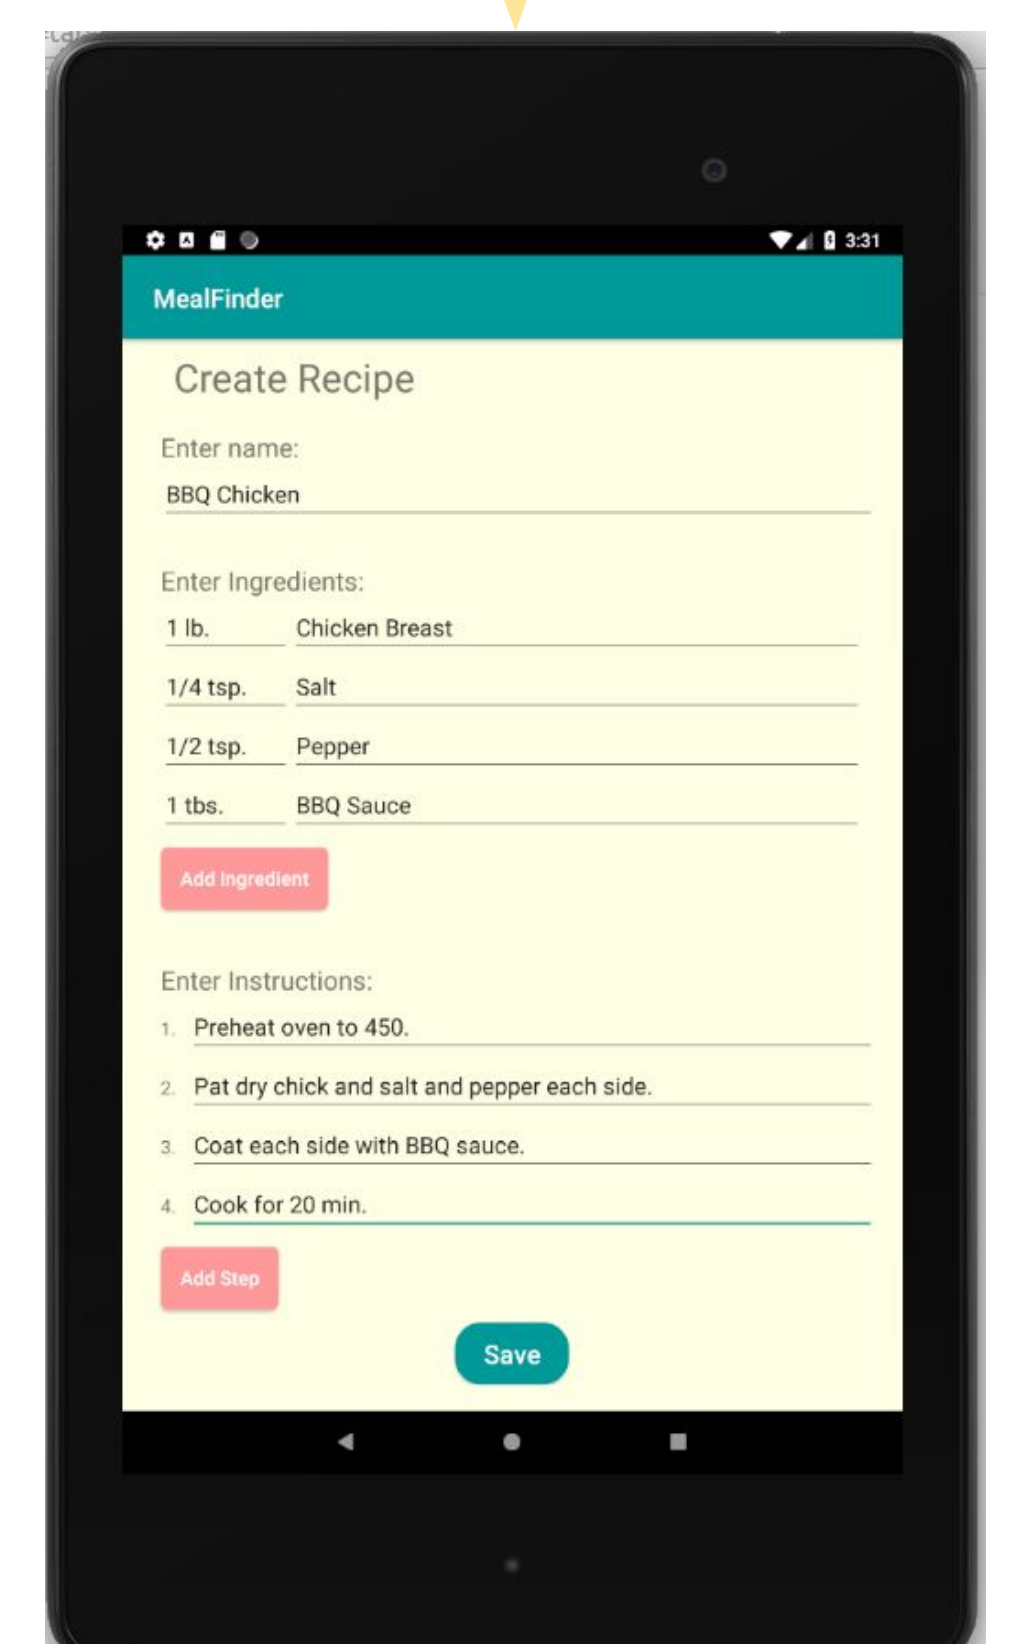

- Database of recipes
- Create custom recipes
- Search recipes with certain ingredients from internet and local database
- View recipes from websites

### View Recipe

Displays recipe on a new screen once clicked on recipe name

### Create Recipe

Create a custom recipe to add to local database: Add name, ingredients, and instructions

## Potential Future Features

- Alter recipes by amount of ingredient or number of servings wanted
- During recipe search, input maximum amount of ingredients wanted in recipes returned from search
- Ability to add recipes from website to local database
